

1. The alignment must auto correct - the name and the size of the box

Mainly in ios and chrome

Already said this issue - they should have done it properly

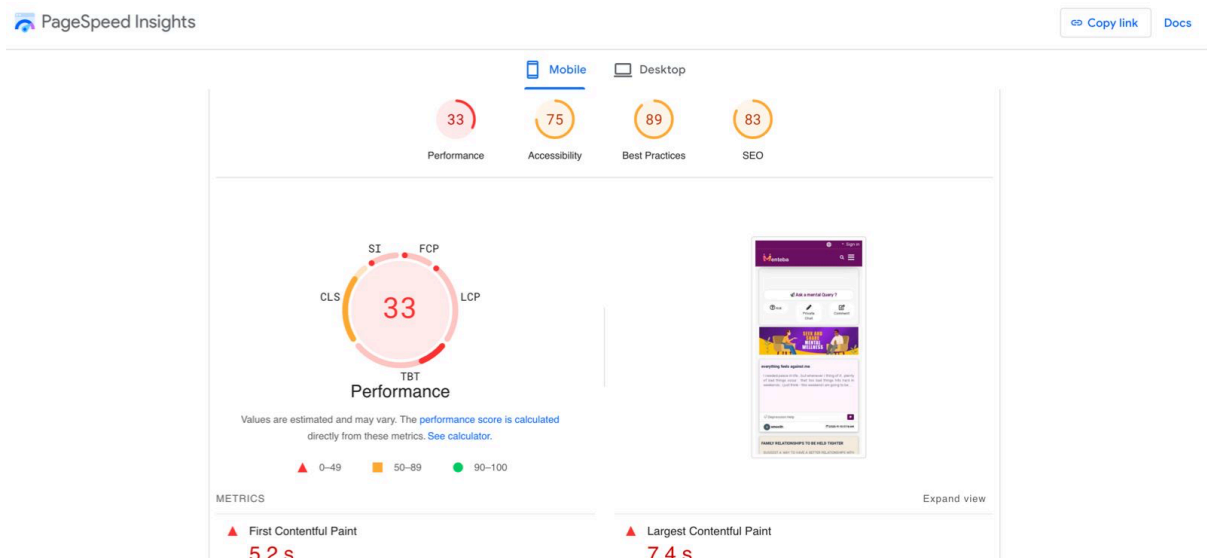

2.

The image must align in the box in right alignment

Already said to restrict the image in portrait . now atleast restrict the image size to the circle pf

3. The website is loading for first time users for very very long time and it is not speed

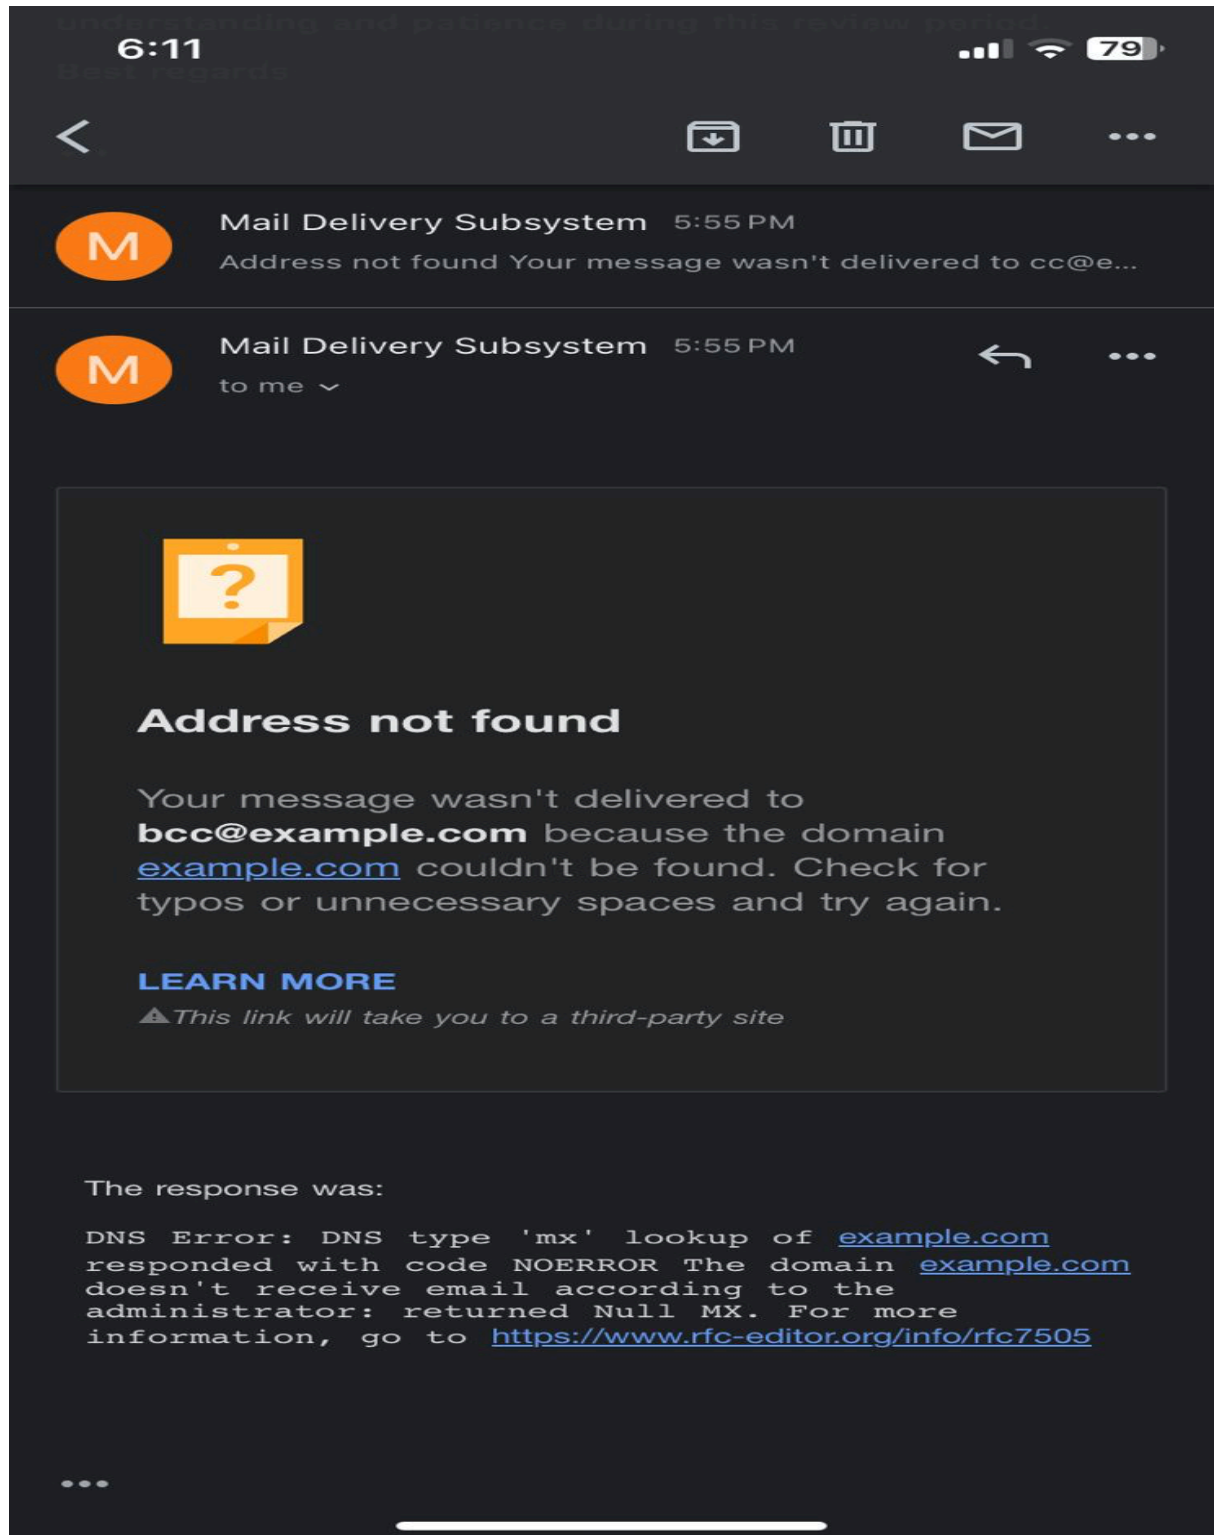

The website takes 3-4 minutes time long for its loading .

The evidence of it

The comment profile picture loading very slow

4. Mainly the mail issue

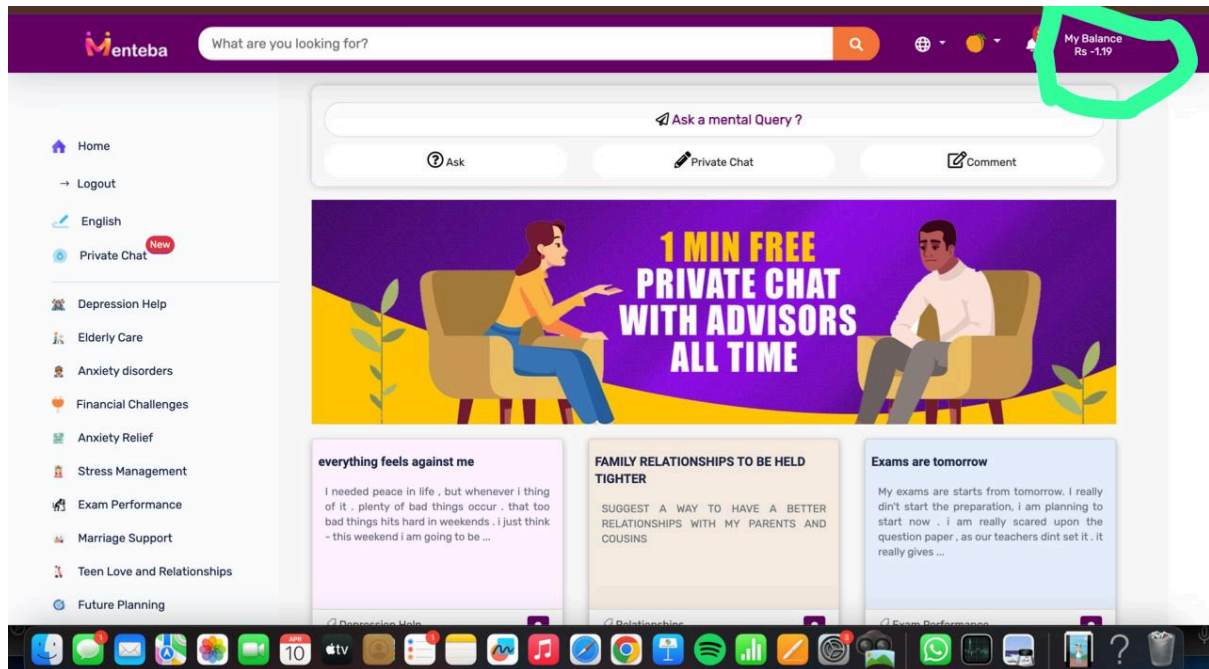

The mail is sending . but not receiving for the mail person . but it shows as it sends and receives

The issues is in server side as it depicts it here .

Note: in future , no issues should come regarding the mail issues

5. The private chat - balance is going in minus -
It should not go in minus

ALREADY IT IS FIXED FOR MANY TIME - before the server change and all it was perfect
If suddenly it happens , who is responsible

The situation :- it was 1 rupees and the bill is showing like this - 0.02

Thank you for your business

menteba.com

This issues will not come is promised by the web developer person , even after the server change . but it is coming .

6. In the view bill

The profile not updated properly
